

Shifting from physical classroom learning to distance learning is not the norm for me, but I have learned that change is here to stay. I've also found that through technology, I can interact with my lecturers and classmates and *it has been fun learning through the online platform.*

Overall, **I have seen an increase in my productivity** due to the cutting down of traveling time and gaining more time to rest and play. I have also learned to be adaptable to press on in my theological studies for this generation and the generation to come to the glory of Jesus Christ.

Frankly speaking, I didn't expect that I would enjoy distance learning classes so much! I am very encouraged that all the lecturers persevered and overcame the odds for us. They have built in more interactive components with discussion in breakout rooms and a ten-minute break every hour which refreshes us.

Now, *I interact more with my classmates and build relationships* in our sharing. **My mindset has also changed.** I used to think that online classes will always fall short in comparison to onsite classes but it has proven otherwise.

遥距课程是当前疫情环境下很好的弥补方式。与过往的网上授课有所不同，遥距课程增强了远距离的互动与体验。经过师生的积极尝试和互动调整，几周后，我已完全可以适应并从中获益。遥距课程保证了我的学业进度和其他规划都能如期进展。

作为疫情期间不停「学」的重要方式，遥距课程某种程度上帮助我适应新的状态。同时也提醒我，无论身处何境，直面自己所领受的使命，并尽心尽力地完成。

今年第二个学期学院通过网络遥距在线上课。过了两个礼拜已经慢慢适应过来，只要很好管理自己，还有省下到学校路程的时间，**学习效率的确提高了**。开始上课软件有时候遇到“卡”的问题，不过最近技术已经改变了这些问题，学习过程变得很流畅。

另外，在线投放的讲义比课室的屏幕更加清晰，**也能与同学们开展互动式交流，不受空间限制**。老师也提供参考的资源 and 途径，给我们进行自主探究。

As I experienced distance learning through this unique situation, we have not been able to meet face-to-face, yet **online classes did not diminish the amount of information shared and interaction within the student body.**

I saw different faculty embracing diverse online tools and media for their teaching. **I really appreciate the lecturers for going the extra mile.** They were not afraid to be creative and to do all they could to make sure that their online class was engaging and educational.
